

Product Code . EL-EELE-11270

## Photovoltaic Solar Energy Unit

### Description

---

#### Photovoltaic Solar Energy Unit

The absorbed energy is provided by simulated solar radiation, which in our case is supplied by a panel with powerful light sources (solar lamps). The Photovoltaic Solar Energy Unit includes equipment that uses the photo-conversion law for the direct conversion of solar radiation into electricity.

Specification:-

- Anodized aluminum structure and panels in painted steel.
- This unit for the study of the conversion of solar energy into electric energy.
- Diagram on the front panel with similar distribution to the elements in the real unit.
- This unit includes wheels for its mobility.

We are leading manufacturers, suppliers of Photovoltaic Solar Energy Unit for Electronics Engineering Lab Equipments. Contact us to get high quality Photovoltaic Solar Energy Unit for Electronics Engineering Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.
