

Product Code . EL-ASLE-11521

Autotronic Training System

Description

Autotronic Training System

The can simulate the operation of fuel injection system, ignition system, and the control of exhaust gas, etc. Experiments include the characteristics, and operation of various sensors and actuators, monitored by microprocessor on the main unit. Interactive Computerized Automotive System. All theoretical, experimental and practical learning procedures are supported by personal computer assisted supervision and dedicated software. The whole system has been modularized to provide electronic and automotive courses with step-by-step experiments on educational technology training.

We are leading manufacturers, suppliers of Autotronic Training System for Autotronics System Lab Equipments. Contact us to get high quality Autotronic Training System for Autotronics System Lab Equipments for schools, colleges, universities, research labs, laboratories and various industries.
